

## FibarSystem 100

FOR AVERAGE RAINFALL  
OR AVERAGE DRAINAGE

This patented system is composed of Fibar® Engineered Wood Fiber and our exclusive FibarFelt geotextile fabric. No other recreational surfacing provides a better combination of safety, accessibility, 15-year warranty and ease of installation at a comparable cost.

## FibarSystem 200

FOR CLIMATES WITH  
HEAVY RAINFALL

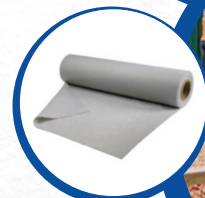

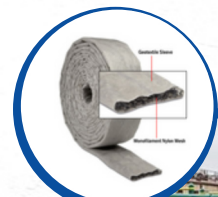

This patented system is composed of Fibar® Engineered Wood Fiber, two layers of FibarFelt geotextile fabric, with owner-supplied drainage stone and PVC pipe for french drain. No other recreational surfacing provides a better combination of safety, accessibility, 20-year warranty and ease of installation at a comparable cost.

## FibarSystem 300

FOR ALL CLIMATES – OUR  
RECOMMENDED SYSTEM

This patented system is composed of Fibar® Engineered Wood Fiber, FibarFelt Geotextile, our exclusive FibarDrain drain strips plus FibarMat wear mats. No other recreational surfacing product provides a better combination of accessibility, safety, and superior drainage. All of these features come with an affordable system and an outstanding 25 year warranty.

 Note: To preserve your warranty, FibarMat wear mats must be installed under all swings, tire swings, slide exits, and sliding poles.
