FINIAL OPTIONS:

FEATURES

- ♣ Solid crank handle made of 316 (the highest grade) cast stainless steel, so it will not rust like a zinc alloy handle will.
- ♣ Superior quality 1/2" diameter fiberglass ribs for maximum flexibility and wind resistance.
- ♣ The 1.5" diameter aluminum center pole has a 1/8" wall thickness, providing incredible strength and durability.
- ♣ Reinforced four-layer pockets prevent fabric from tearing.
- ♣ Modular construction allows for easy repair of individual components if necessary.
- ♣ Maintenance free stainless steel hardware.

The only crank in the industry that is designed and warranted for commercial use! Manufactured with beautiful 9 oz. marine grade acrylic fabric that offers unmatched UV protection and longevity, the Monterey Collection is easy to clean, mold and mildew resistant, and has a guarantee against fading. Other umbrellas are manufactured with lighter, 8 oz. furniture/cushion grade fabric that can sag or stretch over time.

The wind vent has upgraded stitching to prevent tearing. The finial is made of solid TPU plastic and won't become brittle and break.

We use a stainless steel grommet at the top of the notch to keep the fabric in place and prevent rust stains. This exceptional umbrella will perfectly complement any outdoor setting!
