STEP 1

Prepare footing holes. Refer to site plan drawing and site elevation drawing for placement of all support posts. Installer is responsible for proper location of all support posts. Footing hole spacing is shown at right. Footing holes for support posts must be 18" diameter and 24" deep plus 12" surfacing. Place one block (not included) into bottom of each footing hole. See Detail 1-1. Place assembly into footing holes and plumb. Center of bottom rung should be 12" above surfacing. Fill footing holes with concrete to within 3" from ground surface. Allow concrete to cure based upon manufacturer's instructions. Backfill footing holes with dirt, flush with grade. Check all connections and ensure structure is stable. All concrete must be fully cured before use of structure. Installation is complete. Place one (1) Age Appropriate Sticker on structure in a clearly visible location. 12" Detail 1-1 Above Surfacing Surfacing - 12 Support Post 12' Grade 12" Surfacing Backfill 24" In-Ground 24" 21" Concrete Block (Not Included) 38-1/2 Ground / Dirt - ø18" --->
